

Hoof-X™

Smart Footbath Support
for Healthier Hooves

Where Hoof Health Begins

Hoof health starts with consistency. A well-managed footbath program helps maintain clean hooves and limits the spread of common infectious challenges like Digital Dermatitis (DD). When used routinely, footbaths support healthier hooves across the herd, helping prevent small issues from becoming bigger problems.

How It Works

Hoof-X™ delivers bioavailable minerals to help keep hooves healthy by providing:

Improved
hoof hygiene

A balanced microbial
environment

Reliable footbath
performance

These naturally occurring minerals help reduce bacteria linked to hoof lesions, support healthier hooves, and keep your footbath working effectively from start to finish so you get dependable results with less guesswork.

Designed for Real-World Footbath Use

Hoof-X™ fits seamlessly into routine footbath programs:

- ✓ Length & Depth: ≥10 ft, 4 in (submerging dewclaws)
- ✓ Mixing & Maintenance: 4L Hoof-X per 200L water; refill when heavily soiled
- ✓ pH-friendly: Maintains 4.0–5.5 for healthy hoof skin

Supports cleaner, safer, and more predictable footbaths for healthier hooves.

Why Producers Choose Hoof-X™

Challenge	Hoof-X™ Advantage
Rapid neutralization by organic matter	Keeps working longer
Harsh handling or safety concerns	Safer and easier to use
Tough disposal	Eco-friendly formulation
Smell and residue buildup	Cleaner barn environment

Farm-Friendly & Sustainable

Environmentally responsible and safe for disposal as directed

Reduces odor and organic buildup in footbaths

Supports animal welfare, worker safety, and sustainability goals

Free from harsh synthetic chemicals

Hoof-X™ is Ideal For

- ✓ Dairy operations
- ✓ Beef cattle producers
- ✓ Farms with routine footbath programs
- ✓ Producers focused on prevention-first hoof health

Make Hoof Health Easier

Hoof-X™ combines proven mineral action with a safe and sustainable formula. Perfect for busy farms and healthier animals.
